

JUNIOR REPORT
AGM August 2020

We have been having a great response to the junior clinics. To date we have at least 43 juniors attending 4 different clinics on Tuesday afternoons. We are grateful to have an opportunity to have Andrew Noseworthy who has made available his professional services at a reasonable rate so that we can do these clinics safely. The NSGA and the Province have issued protocols to keep the instructor to student ratio at 1:9. There are also some cohort protocols to keep grouping and gathering to a minimum. Dan Fraser has been very up to date and conscious about these safety guidelines.

We are planning an end of summer TOP GUN for our own juniors to celebrate and mark their achievement. Plans are underway to ensure the safety of this event. Our tentative date is Sunday August 23rd.

Peter Cowan (co-chair of the committee) had been working with some volunteers to get our Junior Invitational off the ground this year. David Cook once again brought together some friends-members-junior supporters to make this event fly. We had 49 entrants to this event, which is over double what we had last year. Again this year we are grateful for Chester Building Supplies for their investment in junior golf. They continue to support our program despite the financial uncertainty of our economy this year. We are also grateful for our Clubhouse team and their leader Meagan Sheppard. They came up with creative ways in which we could have some food but without a typical banquet. Their support is always an encouragement.

To date we have not been using or asked for the club's \$5000 contribution to the program. We've been using our Booster savings to help fund things in a year of uncertain revenue. It has been their help that has enabled kids from our club to enter tournaments and subsidize those costs to families. We thank the Club for its past support and look forward to a more certain season next year and the club's annual contribution to resume.

Respectfully submitted by Rev. Joe Green on behalf of Peter Cowan and Dan Fraser who comprise the junior committee.
